Subject: Re: KUC meeting(s) recent

Thanks for the update. Yes I do want more information on everything. I get concerned when you don't run things by me that we are both on the same track - although you always have great ideas. Are we still on for 10 today? Isn't it the monthly morning break at 10 today? So should we say 10:30?

>>> "Ericksen" [REDACTED]

Susan,

Per the Kennecott meeting(s). Sounds like you heard about the one with Dansie boys. If you need more elaboration, let me know.

We had the plan mechanics meeting which seemed to go well. Our process people and KUC process people attended in addition to Chris, Glenn and me. Having the process people there really made a positive difference! They could talk with each other fluidly and provide clarifications when needed. I put together a power point as a reference/reminder so when they start implementing this or that 'step' they can use it as a resource. I have been in contact with Dan Hall at DWQ and explained that it is important for them to have the same version of the 03 plan as the Division and KUC. He agreed, and KUC will move forward and ensure he is cc'd on submittals. KUC said they were going to contact him and work out any submittal details. The next step in this exercise is to do the 'side by side' (this is what should have occurred with Vicky P. a year ago right? Remember how she was going to

Come into our offices and work through it?...and that didn't happen!) We all agreed we'll meet up again in 2 months or less to do the side by side. We need to perform some sorting and compilation work in preparation for the side by side. Everyone was cooperative, and KUC said they are interested in seeing this to completion.

I hope I'm not giving you too much information while you're recovering. I am attempting to be brief and not overwhelm you with elaboration. Chris Kaiser asked about you and how you're progressing. I said you're doing well but don't like the morphine etc.

Hope you have a wonderful day.

Beth
